

## SEGMENT GAPPING DEVICE

### ST130 TrueGAP

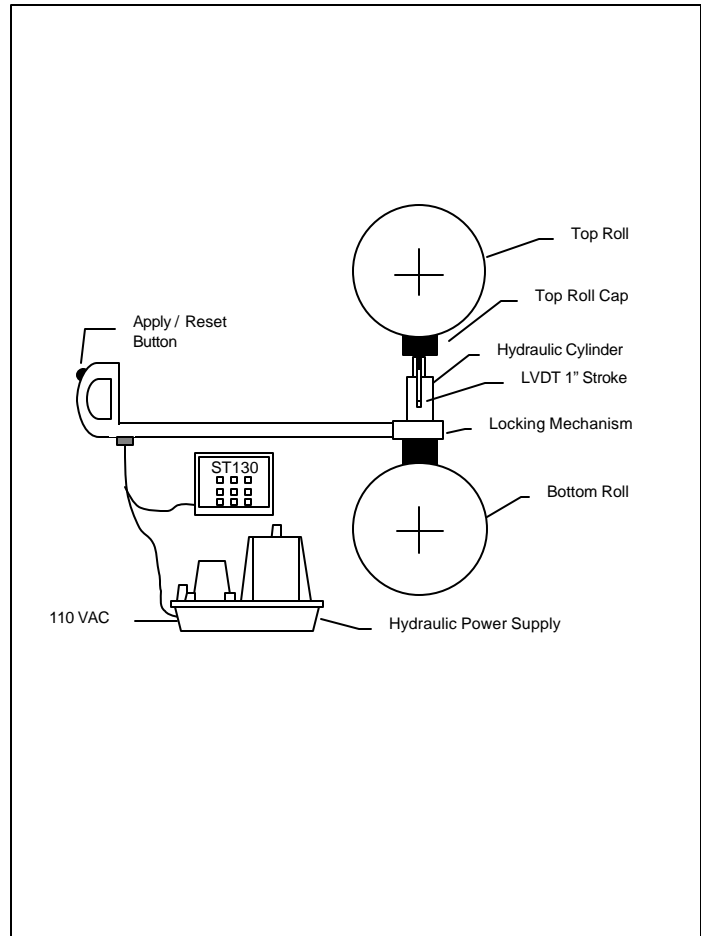

The ST130 TrueGAP is used to eliminate bearing clearances and measure the total gap between segment rolls. The portable system can be used in the maintenance repair area or in the casting machine. The system includes a mini-computer, which automatically stores results and can be customized for any segment arrangement.

### KEY FEATURES

- ◆ Convenient and easy operation
- ◆ Sturdy, Light weight design
- ◆ Resolution to 0.001 inches or 0.03mm
- ◆ Units in English or Metric
- ◆ Color, touch-screen computer display
- ◆ Maintenance free hydraulic power pack
- ◆ Self-centering design of roll caps

### SYSTEM CAPABILITIES

- ◆ Single user functionality
- ◆ Measures roll bearing clearances
- ◆ Pre-programmed tolerance limits for easy reference

### BENEFITS

- ◆ Obtain quick and accurate gap readings
- ◆ Reduce segment re-work time
- ◆ Conformity to “Bench-Mark” standards
- ◆ Reduce cracking and quality issues related to improper gap settings
