

# LASER SEGMENT ALIGNMENT GAUGE

## ST140 LaserALIGN

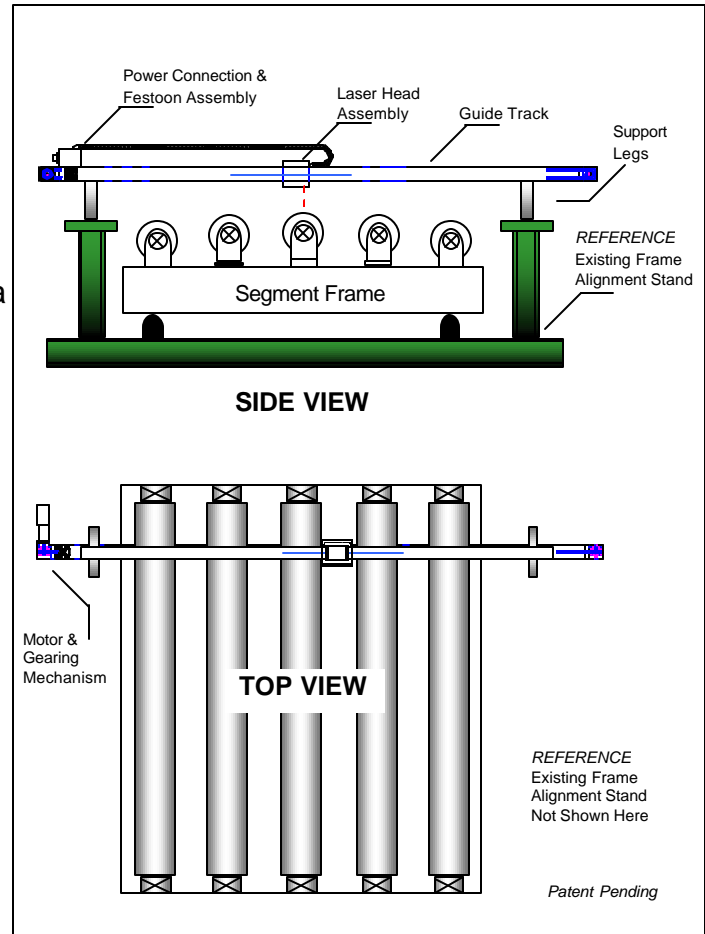

The Sequence Technologies laser-based SEGMENT ALIGNMENT GAUGE quickly measures segment roll alignment with precise accuracy. It provides dependable measurements, displayed and stored on a PC in order for proper alignment adjustments.

### KEY FEATURES

- ◆ Convenient and easy operation
- ◆ Resolution to 0.001 inches or 0.03mm
- ◆ Motor driven Laser assembly
- ◆ Units in English or Metric
- ◆ Custom designed to fit any application
- ◆ Programmable PC display
- ◆ Light weight

### SYSTEM CAPABILITIES

- ◆ Measure segment roll alignment
- ◆ Roll tracking and concentricity
- ◆ Customized PC screens per segment
- ◆ Adjustments made with unit in place
- ◆ Pre-programmed tolerance limits for easy reference

### BENEFITS

- ◆ Obtain accurate alignment readings
- ◆ Reduce segment turn-around time
- ◆ Reduce cracking and quality issues related to transitional defects
