

ST260 LevelSENSE – Mold Powder Control System

Figure 1:
Laser Assembly –
This model rides on a
carriage that is extended
over the mold while casting.
The unit may be swiveled
into practically any spot in
the mold

Figure 2:
Laser Assembly –
Front view of laser
assembly extended over
the mold. Air is purged
through the end cap, which
houses the optics for
diffracting the laser beam.
