

SEN ALIGNMENT GAUGE

ST270 SEN ALIGN

The Sequence Technologies submerged entry nozzle (SEN) ALIGNMENT GAUGE is used to align an SEN in three axes with respect to a level tundish. Align the SEN vertically down from the opening (X & Y axis) and perpendicular to the tundish (rotationally) – all of which are critical to efficient and quality production.

KEY FEATURES

- ◆ Lightweight two-part design
- ◆ Self-contained battery packs
- ◆ Simple use
- ◆ One person operation
- ◆ Customized to any SEN configuration
- ◆ Class II industrial lasers
- ◆ Gimble-mount upper laser to ensure absolute vertical readings

BENEFITS

- ◆ Align SEN within 2mm
- ◆ Reduce “caster folds” & slivers
- ◆ Reduce break-out potential
- ◆ Eliminate down time due to SEN misalignment while casting
