

# Hand Held Distance Measurement Tool

## ST273 PalmDML

The ST273 PalmDML distance measuring tool is an easy-to-use, quick and dependable sensor for taking critical layout measurements with the press of a button. It is an accurate tool for measuring distance, areas, volumes and height differences. It is also capable of adding, subtracting and multiplying. The unit is designed for indoor or outdoor applications. A high powered scope for use in bright sun and a bubble vial level are included to make your measurements easier.
