

CRANE POSITIONING SYSTEM

ST600 CraneSPOT

The ST600 CraneSPOT provides on-board signals to the operator for accurate equipment positioning. The system is ideal for collision avoidance, enabling the operator to place equipment within inches of predetermined targets. The system incorporates laser technology along with on-board computer displays. Up to 20 known targets can be stored in memory for repeatable placement of loads.

KEY FEATURES

- ◆ Range up to 500'
- ◆ Color screen graphics
- ◆ Accuracy of 0.5 inch or 12mm
- ◆ Displays units in English or Metric
- ◆ No calibration necessary
- ◆ Low system maintenance

BENEFITS

- ◆ Reduce equipment replacement costs
- ◆ Continuous crane positioning
- ◆ Reduce shop downtime
- ◆ Increase crane productivity
